# Trading TRDX

Trading TRDX coins on decentralized exchanges (DEXs) can be an appealing venture for both newcomers and seasoned traders. A decentralized exchange is a platform that enables peer-to-peer cryptocurrency transactions without relying on a central authority.

To begin trading TRDX, you'll first need a compatible Phantom wallet that supports TRDX and can connect to DEX platforms. Once your wallet is set up and funded with Solana (SOL), you can buy or sell TRDX directly through the Phantom Wallet or by linking it to DEX platforms such as Raydium, DEX Screener, or GeckoTerminal.

After connecting your wallet, navigate to the trading section, search for the TRDX token, and execute trades by specifying the amount you wish to buy or sell. Always double-check the token's contract address to ensure you're trading the correct asset, and take into account factors like transaction fees and market volatility, as these can influence your overall trading experience.
